PERSONAL STATEMENT I am an ambitious, conscientious and highly motivated graphic and web designer. I have over seven years professional experience working with a variety of mediums and clientele.

In June 2009, I completed a BA(Hons) Graphic Design degree, at the Arts Institute at Bournemouth. I have vast experience in dealing with customers in a professional working environment, having worked as a graphic designer at Printing.com and a web designer at Devon County Council. Good time management and a high level of professionalism were key to these roles, along with frequent liaison with clients and colleagues.

From December 2008 to April 2009 I worked at Printing.com part time. This role required engagement with a variety of clientele, producing bespoke printed material over a wide range of products. It allowed me to put into practice the design knowledge and skill accrued at university.

I have over eight years freelance/consultancy experience and am competent in industry standard software, including Photoshop, Illustrator, InDesign, Dreamweaver and Flash. My strengths include typography, layout and idea generation. My portfolio can be viewed online at www.jameshambly.com
