PERSONAL STATEMENT I am an ambitious, conscientious and highly motivated graphic and web designer with over nine years commercial experience. I have a BA (Hons) Graphic Design degree from the Arts Institute at Bournemouth (now AUCB). I am currently self employed as a graphic and web designer.

I have vast experience in dealing with clients in a professional working environment, having worked as a graphic and web designer at Devon County Council and a graphic designer at Printing.com. Good time management and a high level of professionalism were key to these roles, along with frequent liaison with clients and colleagues.

I have an established freelance client-base, having worked on a wide range of projects for a plethora of different clients since 2002. Attention to detail and a high level of communication skills have been crucial in creating a successful business.

I am highly competent in industry standard software, including Photoshop, Illustrator, InDesign, Dreamweaver and Flash. My strengths include typography, layout and idea generation. I have also worked extensively with the WordPress platform to create bespoke CMS powered web sites.
